† It is important to install cassettes with the same rolling direction.
‡ VMZ Strat®: zinc with anti-corrosion and anti-finger mark properties.

Flame retarded egg carton is glued to the back of the cassettes, ensuring excellent hold and guaranteeing perfect flatness.

Framework

The VMZ Opus system is supplied with a framework composed of:
- Galvanised steel fixing rails
- Junctions in zinc for flashing.

Area of use

Authorised substructures
- Installed on galvanised steel framework fixed to brickwork or on BA13.
- Walls can be new or used.

Type of walls
- Flat and vertical walls.

Reference documents

EN 988 standard European quality standard for rolled zinc.

Further Information on VMZINC®
Standard or customised description, references, specification and installation guide on www.vmzinc.com

The sole objective of this document is to describe the main technical features of VMZINC® products manufactured by Umicore. Specification and installation of these products remains the exclusive competency of building professionals who must ensure that the use of these products is adapted to the construction in question and compatible with the other products and techniques used. Specification and installation of the products implies compliance with current norms and recommendations of the manufacturer. In this respect, Umicore publishes specification and installation guides that are regularly updated for specific geographical zones, and also organises training courses. All details may be obtained on request from the local VMZINC® team. Umicore may not be held responsible for any specification or use that does not comply with these norms, recommendations and practices.
